

# FEBRUARY SPECIALS

AT [SPRAYERBARN.COM.AU](http://SPRAYERBARN.COM.AU)

## WEEDSEEKER

### SAVE \$\$ THOUSANDS IN CHEMICAL USE

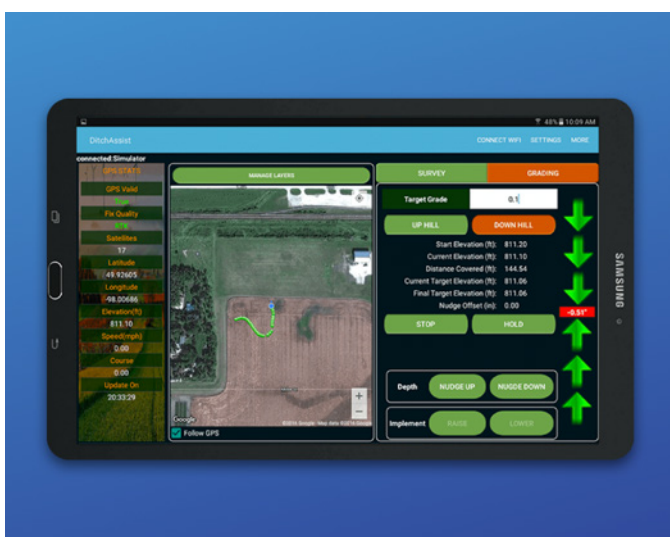

Weedseeker technology uses infrared sensors to spray only weeds and not the bare ground. Herbicide costs are reduced and resistance to weed populations greatly improves sustainability.

With the total chemical released reduced the occurrence of drift is minimised.

Available in trailing configurations 24-40m or stand alone retro fitted – from one sensor up to 40m.

For more information visit [sprayerbarn.com.au](http://sprayerbarn.com.au)

POA
